### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 36-48 are pending in this application.

#### ***Action Summary***

1. Examiner acknowledges the cancellation of claims 30 and 33-35. Therefore, the restriction requirement is hereby withdrawn.

#### ***Restriction Requirement***

2. Applicant's election without traverse of Group I, claims 30 and 33-35 in the reply filed on March 9, 2005 is acknowledged.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 36-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. (US 5,667,804) in view of Appel et al. (US 5,256,440).

Wong teaches in col. 8, lines 23-36 a forming means for forming bands onto a dosage form. The bands may be placed or printed dosage forms. Column 11, lines 60 through column 12 teach that the bands may be formed on a Tait capsealer machine.

circumscribed on the blank to form bands within the grooves. Printing wheels and transport mechanisms are taught on pages 16-19.

Appel teaches forming grooves within a dosage form. Column 7, lines 19-34 teach circumscribing the groove prior to coating.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the dosage forms of Appel with the invention of Wong. As Appel teaches a method of forming grooves onto dosage forms and Wong teaches a Tait Capsealer machine, it would be obvious that combination of Wong in view of Appel will align the groove and form bands thereon.

### ***Conclusion***

4. Claims 36-48 are rejected.
